

Welcome to
Using AI Mode in
 Chrome

Using AI Mode in Chrome for Research, Planning, and Comparison

Understand the scenario

You are a New Employee for Worx1, an organization that wants to use AI Mode for research, planning, and comparison. Your task is to use AI Mode in Google Chrome to research with verifiable sources, generate structured comparisons, plan local activities, and transform answers into reusable assets. You will practice image and voice inputs, follow-up refinement, and citation checking.

Getting Started (Before You Begin)

Before beginning this lab, make sure:

- You are signed into your Google Workspace (work or school) Gmail account.
- Access to Google Docs in a desktop browser.
- Your administrator has enabled Gemini (formerly Duet AI).
- You are using the Google Chrome browser for best compatibility.

Exercise 1: Open AI Mode and learn the interface

- Enter your Gmail Username and Password into the following textboxes:

Gmail Users Name

Gmail Password

- Sign into Chrome as T <Name> by using T <PW> as the password.

Expand this hint for guidance on signing into Google Chrome.

Controls are centered under Meet AI Mode.

- In Chrome, navigate to T google.com, and then select **AI Mode**.

- Identify the following key controls:
 - Locate the Ask anything box.

- Locate the Image upload icon.

- Locate the Microphone icon.

- Locate the Submit button.

- Locate the Follow-up suggestions and sources section after an answer.

The image icon lets you add a picture. The mic icon captures voice.

Check your work

Exercise 2: Ask multi-step research questions with follow-ups

- In the Ask anything prompt textbox, enter the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on asking multi-step research questions with follow-ups.

- Select at least **two citations** to verify sources.

Expand this hint for guidance on asking multi-step research questions with follow-ups.

Open citations in new tabs, skim, then return.

- Enter a follow-up question, by using the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on asking multi-step research questions with follow-ups.

- Prioritize low latency for video calls.

Expand this hint for guidance on asking multi-step research questions with follow-ups.

Review how the updated answer connects back to your first prompt. Note that context is remembered without retyping the original question.

Check your work

Exercise 3: Generate a comparison table using AI Mode

- In the Ask anything prompt textbox, generate a comparison table by entering the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on generating a comparison table.

If the answer is a paragraph, ask Gemini to *format the response as a table* and resubmit.

- Enter a follow-up question, by using the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on generating a comparison table.

- Add a use-case row for side sleepers and heavy sleepers bu using the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on generating a comparison table.

Check your work

Exercise 4: Local activities with constraints

- In the Ask anything prompt textbox, retrieve a list of local activities and constraints by entering the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on retrieving a list of local activities and constraints.

- Select at least **two links** to verify sources.

Expand this hint for guidance on retrieving a list of local activities and constraints.

- Enter a follow-up question, by using the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on retrieving a list of local activities and constraints.

- Enter a follow-up, by using the following prompt:

Open to view the Sample prompt:

Filter to outdoor music only.

Here are five free, outdoor music events happening in downtown St. Augustine this week:

1. Sing Out Loud Festival at Colonial Oak Music Park

- **Summary:** As part of the Sing Out Loud Festival, the Colonial Oak Music Park will host free performances by local and regional musicians. It is located under a large, 300-year-old oak tree, offering a scenic outdoor venue.
- **Date and Time:** Friday, September 5, 2025, and Saturday, September 6, 2025. Performances occur during the evenings.
- **Neighborhood:** Colonial Quarter, downtown St. Augustine.
- **Link:** <https://www.singoutloudfestival.com/events>.

2. Sing Out Loud Festival at Dog Rose Brewing Co.

- Enter a follow-up, by using the following prompt:

Exercise 5: Ask with an image

- Save the following image to your desktop:

Expand this hint for guidance on saving an image.

- In AI Mode, select the image upload icon, and then select your file.

Expand this hint for guidance on asking with an image.

- Enter a follow-up question, by using the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on asking a follow-up question.

- Ask AI Mode to **T** extract the specs.

The screenshot shows the AI Mode interface with a navigation bar at the top containing 'AI Mode', 'All', 'Images', 'Videos', 'News', and 'More'. Below the navigation bar, the prompt 'extract the specs.' is displayed. The response is titled 'Key Specifications of the Akai Professional Force:' and lists six bullet points:

- **Standalone Operation:** Capable of full music production and DJ performance without the need for an external computer.
- **Performance Interface:** Equipped with a 64-pad (8x8) RGB clip launch matrix and a 7-inch full-color capacitive multitouch display for intuitive control.
- **Hardware Controls:** Features 8 touch-sensitive knobs, each with its own graphical OLED display for visual feedback.
- **Connectivity:** Offers comprehensive connectivity including multiple audio inputs (microphone, instrument, line), 4 audio outputs, MIDI In/Out/Thru ports, and 4 configurable CV/Gate outputs for integration with modular synthesizers.
- **Internal Synthesis & Sampling:** Includes 4 powerful, fully-editable synth engines (Hype, TubeSynth, Bassline, Electric) and advanced MPC-style sample editing capabilities with real-time time-stretching and pitch-shifting.
- **Storage:** Comes with 16GB of internal storage, expandable via SD card or a 2.5" SATA drive.

- Ask AI Mode to **T** extract the prices.

- Ask AI Mode to T extract the warnings.

- Ask AI Mode to T change the output format to bullets.

- Ask AI Mode to T change the output format to numbered.

- Ask AI Mode to T change the output format to table.

change the output format to table

Here are the warnings and known issues for the Akai Professional Force, presented in a table format:

Category	Warning/Issue	Description
Firmware Issues	Firmware Update Risks	Do not solely rely on updates to fix existing issues; they can sometimes introduce new problems. Specific versions (e.g., 3.5 Beta) have known bugs like incorrect loop export, RAM issues, key group, or saturation problems.
Plugin/Project Stability	Plugin & Project Loading Issues	Certain firmware versions or configurations might cause difficulties with plugin activation, sound/plugin access, or even prevent projects from loading correctly.
Hardware Compatibility	USB Audio Interface Compatibility	While designed for class-compliant interfaces, compatibility isn't universal and can change with firmware. Check user communities for current compatibility lists.
Hardware Safety	Phantom Power Hot-Plugging Hazard	Never hot-plug a microphone with phantom power enabled into the Akai Force's inputs to prevent severe damage to the internal sound card.
MIDI Functionality	MIDI Connectivity Glitches	Reports include crashes when using multiple MIDI hubs and connected MIDI devices unselecting themselves, requiring manual re-selection.
Performance Limitations	Audio Track Restrictions	The Force is limited to 8 stereo audio tracks for simultaneous recording and playback, which might be a constraint for complex sessions.

Exercise 6: Voice input

- Allow microphone permissions if prompted in Chrome.

Expand this hint for guidance on voice input.

- Ask the following prompt by voice:

Open to view the Sample prompt:

Expand this hint for guidance on voice input.

If blocked, select the lock icon in the address bar → Site settings → Microphone: Allow

Check your work

Exercise 7: Source-first answers and "explain the change"

- In the Ask anything prompt textbox, generate source-first answers by entering the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on source first answers.

- Enter a follow-up, by using the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on source first answers.

Phrases like independent sources, cite inline, and explain changes push higher-trust outputs.

Check your work

Exercise 8: Convert results into a reusable checklist

- In the Ask anything prompt textbox, generate source-first answers by entering the following prompt:

Open to view the Sample prompt:

Expand this hint for guidance on converting results into a reusable checklist.

- Copy the checklist to your clipboard.
- Open Google Docs, create a new document named T AI Mode Lab - Checklist, and then paste the checklist.

Check your work

Summary

Congratulations, you have completed the **Using Google Gemini in Google Docs (G Suite Workspace)** Lab.

You have accomplished the following:

- Opened AI Mode and learned the interface.
- Asked multi-step research questions with follow-ups.
- Generated a comparison table using AI Mode.
- Searched local activities with constraints.
- Asked with an image.
- Performed voice input.
- Turned outlines into full document scripts.
- Source-first answers and "explained the change".
- Converted results into a reusable checklist.

Congratulations
