Data & Analytics
 Gemini

Use Gemini in Google Sheets for Data & Analytics

Understand the scenario

You are a New Employee for Worx1, an organization that needs to write, edit, and collaborate more efficiently in Google Docs using Gemini, Google's AI assistant for Workspace. In this Lab, you will use Google Gemini in Google Docs. First, you will generate and analyze fictional Q2 sales data, and then you will calculate total revenue. Next, you will visualize the data with charts, and then you will ask Gemini questions about trends. Finally, you will clean, sort, and format data, and then you will forecast future trends.

Getting Started (Before You Begin)

Before beginning this lab, make sure:

- You are signed into your Google Workspace (work or school) Gmail account.
- Gemini enabled in Google Sheets.
- Your administrator has enabled Gemini (formerly Duet AI).
- You are using the Google Chrome browser for best compatibility.

Exercise 1: Create your sample data

- Enter your Gmail Username and Password into the following textboxes:

Gmail Users Name

Gmail Password

- Sign into Chrome as <Name> by using <PW> as the password.

Expand this hint for guidance on signing into Google Chrome.

- On the *Sign in to Chrome* page, select **Sign in**.

- On the *Sign in to Chrome Use your Google Account* page, in email or phone, enter T <Name>, and then select **Next**

The image shows the 'Sign in to Chrome' screen. At the top is the Google logo. Below it, the text 'Sign in to Chrome' is centered, followed by 'Use your Google Account'. There is a text input field with the placeholder 'Email or phone' and the email address 'kemperdesignservices@gmail.com' entered. Below the input field is a link 'Forgot email?'. Further down, it says 'Not your computer? Use Guest mode to sign in privately.' with a link 'Learn more about using Guest mode'. At the bottom left is a link 'Create account', and at the bottom right is a blue button labeled 'Next'.

On the *Google Welcome* page, in Enter your password, enter T <PW>, and then select **Next**.

The image shows the 'Welcome' screen. At the top is the Google logo. Below it, the text 'Welcome' is centered. There is a user profile section showing a person icon and the email address 'kemperdesignservices@gmail.com' with a dropdown arrow. Below this is a text input field with the placeholder 'Enter your password' and a password 'T' followed by dots. At the bottom left is a checkbox labeled 'Show password'.

- On the *Turn on Sync* page, select **No, thanks**.

- On the *Set your default browser* page, select **Set as default**.

- On the *Settings Apps > Default apps > Google Chrome* page, in *Make Google Chrome your default browser*, select **Set default**.

- On the *Enhanced ad privacy in Chrome* page, select **More**, and then select **Got it**.

- Open a Blank Google Sheet.

Expand this hint for guidance on opening a Google Sheet.

- On the Google.com Home page, in the upper right-hand corner, select the **Google Apps** icon, and then select **Sheets**.

- Select **Blank spreadsheet**

- Name the sheet **T Sales_Data**.

Expand this hint for guidance on naming a Google Sheet.

- At the bottom of the Blank spreadsheet, on the Sheet tab, select the dropdown, and then select **Rename**.

- Enter **T** Sales_Data, and then select **Enter**.

- Copy and paste the following sample dataset into cells **T** A1:A11 of the **Sales_Data** worksheet.

Open to view the Sample prompt:

Product Name
ThunderWidget
SparkPlugX
PowerDrill Pro
EcoVacuum

TurboBlender
 NanoHeater
 UltraFan
 SmartToaster
 GrillMaster 3000
 AirChiller Pro

Expand this hint for guidance on pasting data into a Google Sheet. ^

- Select all of the Sample Data above, right-click, and select **Copy**.
- On the **Sales_Data** worksheet, select cells **A1:A11**, right-click, select **Paste special**, and then select **Values only**.

- Your worksheet should look like the following:

	A	B
1	Product Name	
2	ThunderWidget	
3	SparkPlugX	
4	PowerDrill Pro	
5	EcoVacuum	
6	TurboBlender	
7	NanoHeater	
8	UltraFan	
9	SmartToaster	
10	GrillMaster 3000	
11	AirChiller Pro	
12		

- Copy and paste the following sample dataset into cells **T B1:B11** of the **Sales_Data** worksheet.

Open to view the Sample prompt:

**Units Sold**

120
85
200
160
95
60
175
70
130
110

- Your spreadsheet should resemble the following:

B1:B11		fx Units Sold
	A	B
1	Product Name	Units Sold
2	ThunderWidget	120
3	SparkPlugX	85
4	PowerDrill Pro	200
5	EcoVacuum	160
6	TurboBlender	95
7	NanoHeater	60
8	UltraFan	175
9	SmartToaster	70
10	GrillMaster 3000	130
11	AirChiller Pro	110

- Copy and paste the following sample dataset into cells T C1:C11 of the **Sales_Data** worksheet.

Open to view the Sample prompt:

**Price per Unit**

19.99
24.50
79.99
99.00
49.99
34.95
45.00
39.95
150.00
89.99

- Your spreadsheet should resemble the following:

C1:C11 Price per Unit			
	A	B	C
1	Product Name	Units Sold	Price per Unit
2	ThunderWidget	120	19.99
3	SparkPlugX	85	24.5
4	PowerDrill Pro	200	79.99
5	EcoVacuum	160	99
6	TurboBlender	95	49.99
7	NanoHeater	60	34.95
8	UltraFan	175	45
9	SmartToaster	70	39.95
10	GrillMaster 3000	130	150
11	AirChiller Pro	110	89.99

- Copy and paste the following sample dataset into cells **D1:D11** of the **Sales_Data** worksheet.

Open to view the Sample prompt:

Region
East
West
South
North
East
West
South
North
East
West

- Your spreadsheet should resemble the following:

D1:D11 Price per Unit				
	A	B	C	D
1	Product Name	Units Sold	Price per Unit	Price per Unit
2	ThunderWidget	120	19.99	19.99
3	SparkPlugX	85	24.5	24.5
4	PowerDrill Pro	200	79.99	79.99
5	EcoVacuum	160	99	99
6	TurboBlender	95	49.99	49.99
7	NanoHeater	60	34.95	34.95
8	UltraFan	175	45	45
9	SmartToaster	70	39.95	39.95
10	GrillMaster 3000	130	150	150
11	AirChiller Pro	110	89.99	89.99
12				

- Copy and paste the following sample dataset into cells T E1:E11 of the **Sales_Data** worksheet.

Open to view the Sample prompt:

Salesperson
 Jordan Mitchell
 Casey Nguyen
 Morgan Lee
 Taylor Brooks
 Devin Carter
 Skylar Morgan
 Avery Thompson
 Peyton Reynolds
 Cameron Rivera
 Jamie Taylor

- Your spreadsheet should resemble the following:

E1:E11  Salesperson					
	A	B	C	D	E
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson
2	ThunderWidget	120	19.99	19.99	Jordan Mitchell
3	SparkPlugX	85	24.5	24.5	Casey Nguyen
4	PowerDrill Pro	200	79.99	79.99	Morgan Lee
5	EcoVacuum	160	99	99	Taylor Brooks
6	TurboBlender	95	49.99	49.99	Devin Carter
7	NanoHeater	60	34.95	34.95	Skylar Morgan
8	UltraFan	175	45	45	Avery Thompson
9	SmartToaster	70	39.95	39.95	Peyton Reynolds
10	GrillMaster 3000	130	150	150	Cameron Rivera
11	AirChiller Pro	110	89.99	89.99	Jamie Taylor

- Multiply Units Sold by Price per Unit

Expand this hint for guidance on multiplying units sold by price per unit. ^

- In cell **F1**, enter **Total Revenue**, and then in cell **F2**, enter the following formula:

$$=B2*C2$$

	D	E	F
Price per Unit	Price per Unit	Salesperson	Total Revenue
19.99	19.99	Jordan Mitchell	2398.8
24.5	24.5	Casey Nguyen	
79.99	79.99	Morgan Lee	
99	99	Taylor Brooks	
49.99	49.99	Devin Carter	
24.05	24.05	Glenn Morris	

- Select **Enter**, and then drag the fill handle down to copy the formula for rows **2-11**.

	F
Total Revenue	
ell	2398.8
en	2082.5
	15998
s	15840
	4749.05
n	2097
isor	7875
olds	2796.5
era	19500
	9898.9

- Format column **F** as **Currency**.

Expand this hint for guidance on converting to the Currency format.

- On the **Sales_data** spreadsheet, select column **F**.
- Select **Format**, select **Number**, and then select **Currency**.

Each row now shows the correct revenue per product.

- You have successfully created your sample data. Now let's see what Gemini can do!

Check your work

Exercise 2: Create charts using Gemini

- Create a **column chart** showing total revenue by product by using the following prompt:

Open to view the Sample prompt:

T Create a column chart showing total revenue by product.

Expand this hint for guidance on creating a column chart.

- On the Sample_data spreadsheet, highlight range **A1:A11** and **F1:F11**.
- Select the **Gemini icon**, or right-click , and then select **Help me analyze**.

Product Name	Units Sold	Price per Unit	Salesperson	Total Revenue
ThunderWidget	120	19.99	Jordan Mitchell	2398.8
SparkPlugX	85	24.5	Casey Nguyen	2082.5
PowerDrill Pro	200	79.99	Morgan Lee	15998
EcoVacuum	160	99	Taylor Brooks	15840
TurboBlender	95	49.99	Devlin Carter	4749.05
NanoHeater	60	34.95	Skyler Morgan	2097
UltraFan	175	45	Avery Thompson	7875
SmartToaster	70	39.95	Payton Reynolds	2796.5
GrillMaster 3000	130	150	Cameron Rivera	19500
AirChiller Pro	110	89.99	Jamie Taylor	9898.9

- In the Gemini panel, enter **T** Create a column chart showing total revenue by product., and then select **Enter**.

- Select **Insert**, and then select **Charts only** when prompted.

- Adjust the chart title and colors if desired.
- Use when comparing values across categories (e.g., sales per product)
- Create a **bar chart** comparing units sold by product, by using the following prompt:

? Open to view the Sample prompt:

T Show a bar chart comparing units sold by product.

^

Expand this hint for guidance on creating a bar chart.

- On the Sample_data spreadsheet, highlight range **A1:A11** and **F1:F11**.
- Select the **Gemini icon**, or right-click , and then select **Help me analyze**.

The screenshot shows a Google Sheets spreadsheet titled 'Sales_data'. The data is organized into columns: A (Product Name), B (Units Sold), C (Price per Unit), D (Price per Unit), E (Salesperson), and F (Total Revenue). Rows 1 through 11 contain data for various products. The Gemini panel is open on the right side of the spreadsheet, showing options like 'Sentiment analyzer', 'Outreach specialist', and 'Sales pitch ideator'. The 'Gemini' icon is highlighted in the top right corner of the spreadsheet.

- In the Gemini panel, enter **T** Show a bar chart comparing units sold by product., and then select **Enter**.

The screenshot shows the Gemini panel with a bar chart titled 'Units Sold by Product'. The chart compares the units sold for five products: AirChiller Pro, GrillMaster 3000, PowerDrill Pro, SparkPlugX, and TurboBlender. The x-axis represents 'Units Sold' from 0 to 150. The y-axis lists the product names. Below the chart, there is a text box that says: 'The bar chart titled 'Units Sold by Product' compares the units sold for each product. You can insert the chart into your spreadsheet.' There are buttons for 'Insert' and 'Copy' at the bottom of the text box.

- Select **Insert**, and then select **Charts only** when prompted.

A bar chart is added showing revenue comparison. You want horizontal bars for category comparison, especially for long category names.

- Create a **Scatter plot** showing relationships between two numeric variables, by using the following prompt:

Open to view the Sample prompt:

Insert a scatter plot showing units sold and price per unit.

Expand this hint for guidance on creating a scatter plot.

- On the *Sample_data* spreadsheet, highlight range **C1:C11** and **B1:B11**.

B1:C11 Units Sold				
	A	B	C	D
1	Product Name	Units Sold	Price per Unit	Price per U
2	ThunderWidget	120	19.99	
3	SparkPlugX	85	24.5	
4	PowerDrill Pro	200	79.99	
5	EcoVacuum	160	99	
6	TurboBlender	95	49.99	
7	NanoHeater	60	34.95	
8	UltraFan	175	45	
9	SmartToaster	70	39.95	
10	GrillMaster 3000	130	150	
11	AirChiller Pro	110	89.99	
12				

- Select the **Gemini icon**, or right-click , and then select **Help me analyze**.
- In the Gemini panel, enter **T** Insert a scatter plot showing units sold and price per unit., and then select **Enter**.

- Select **Insert** when prompted.

- Adjust the chart title and colors if desired.
- Create a **Combo chart** showing units sold (bar) + revenue (line) on same chart, by using the following prompt:

Open to view the Sample prompt:

T Create a combo chart with units sold as bars and revenue as a line.

Expand this hint for guidance on creating a combo chart.

- Highlight range **A1:A11**, **B1:B11** and **F1:F11**.

	A	B	C	D	E	F
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue
2	ThunderWidget	120	19.99	19.99	Jordan Mitchell	2398.8
3	SparkPlugX	85	24.5	24.5	Casey Nguyen	2082.5
4	PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998
5	EcoVacuum	160	99	99	Taylor Brooks	15840
6	TurboBlender	95	49.99	49.99	Devin Carter	4749.05
7	NanoHeater	60	34.95	34.95	Skylar Morgan	2097
8	UltraFan	175	45	45	Avery Thompson	7875
9	SmartToaster	70	39.95	39.95	Peyton Reynolds	2796.5
10	GrillMaster 3000	130	150	150	Cameron Rivera	19500
11	AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9
12						

- Select the **Gemini icon**, or right-click, and then select **Help me analyze**.
- In the Gemini panel, enter **Create a combo chart with units sold as bars and revenue as a line.**, and then select **Enter**.

- Select **Insert** when prompted.

- Adjust the chart title and colors if desired.
- Create a **Histogram** of units sold, by using the following prompt:

Open to view the Sample prompt:

T Create a histogram of units sold.

Expand this hint for guidance on creating a combo chart.

- Highlight range **B2:B11**.

	B	
Name	Units Sold	Price
Widget	120	
Widget X	85	
Drill Pro	200	
Drum	160	
Speaker	95	
Speaker	60	
Drum	175	
Speaker	70	
Speaker 3000	130	
Speaker Pro	110	

- Select the **Gemini icon**, or right-click , and the select **Help me analyze**.
- In the Gemini panel, enter **Create a histogram of units sold.**, and then select **Enter**.
- Select **Insert** when prompted.

- Adjust the chart title and colors if desired.
- Create a pivot table showing total units sold by salespeople.

Expand this hint for guidance on creating a pivot table.

- In Gemini, select **Create a pivot table showing total units sold by salesperson**, and then select **Enter**.
- Review Gemini's plan, and then select **Apply**.

- Undo the addition of the pivot table by selecting **Undo** in the Gemini blade.

- Name the Google sheet **Sales_data**, save it as a **.xlsx** file extension, and then download a copy to your **Desktop**.

Check your work

Exercise 3: Ask Gemini Questions About the Data

- Use natural language to explore insights by entering the following prompt:

Open to view the Sample prompt:

T Which product had the highest total revenue?

Expand this hint for guidance on using natural language to explore insights.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Which product had the highest total revenue?

- Gemini suggests that the product with the highest total revenue is the GrillMaster 3000, with a total revenue of \$19,500.00.

Verify answers by comparing to your chart or formulas.

- Use natural language to explore insights by entering the following prompt:

Open to view the Sample prompt:

T What's the average price per unit?

Expand this hint for guidance on using natural language to explore insights.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** What's the average price per unit?

- Gemini suggests that the average price per unit is 63.336.

- Use natural language to explore insights by entering the following prompt:

Open to view the Sample prompt:

T Who sold the most units?

Expand this hint for guidance on using natural language to explore insights. ^

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Who sold the most units?

- Gemini suggests that the salesperson who sold the most units is Morgan Lee, with a total of 200 units sold.

Check your work

Exercise 4: Clean and Sort the Data

- Sort by Units Sold (Ascending) by entering the following Gemini Prompt:

Open to view the Sample prompt:

T Sort by Units Sold in ascending order.

Expand this hint for guidance on sorting using Gemini.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Sort by Units Sold in ascending order., and then select **Enter**.

- Your spreadsheet should change from this image:

	A	B	C	D	E	F	G
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue	
2	ThunderWidget	120	19.99	19.99	Jordan Mitchell	2398.8	
3	SparkPlugX	85	24.5	24.5	Casey Nguyen	2082.5	
4	PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998	
5	EcoVacuum	160	99	99	Taylor Brooks	15840	
6	TurboBlender	95	49.99	49.99	Devin Carter	4749.05	
7	NanoHeater	60	34.95	34.95	Skylar Morgan	2097	
8	UltraFan	175	45	45	Avery Thompson	7875	
9	SmartToaster	70	39.95	39.95	Peyton Reynolds	2796.5	
10	GrillMaster 3000	130	150	150	Cameron Rivera	19500	
11	AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9	
12							

- Select **Apply**.

A2:F11 NanoHeater							
	A	B	C	D	E	F	G
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue	
2	NanoHeater	60	34.95	34.95	Skylar Morgan	2097	
3	SmartToaster	70	39.95	39.95	Peyton Reynolds	2796.5	
4	SparkPlugX	85	24.5	24.5	Casey Nguyen	2082.5	
5	TurboBlender	95	49.99	49.99	Devin Carter	4749.05	
6	AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9	
7	ThunderWidget	120	19.99	19.99	Jordan Mitchell	2398.8	
8	GrillMaster 3000	130	150	150	Cameron Rivera	19500	
9	EcoVacuum	160	99	99	Taylor Brooks	15840	
10	UltraFan	175	45	45	Avery Thompson	7875	
11	PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998	
12							

- Review your updated spreadsheet.
- Sort by Units Sold (Descending) by entering the following Gemini Prompt:

Open to view the Sample prompt:

T Sort the table by Units Sold from highest to lowest.

Expand this hint for guidance on sorting using Gemini.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Sort the table by Units Sold from highest to lowest., and then select **Enter**.

Sort the table by Units Sold from highest to lowest.

- Gemini informs us that the range A2:F11 will be sorted based on the values in B2:B11, in descending order.

- Select **Apply**.

	A	B	C	D	E	F	G
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue	
2	PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998	
3	UltraFan	175	45	45	Avery Thompson	7875	
4	EcoVacuum	160	99	99	Taylor Brooks	15840	
5	GrillMaster 3000	130	150	150	Cameron Rivera	19500	
6	ThunderWidget	120	19.99	19.99	Jordan Mitchell	2398.8	
7	AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9	
8	TurboBlender	95	49.99	49.99	Devin Carter	4749.05	
9	SparkPlugX	85	24.5	24.5	Casey Nguyen	2082.5	
10	SmartToaster	70	39.95	39.95	Peyton Reynolds	2796.5	
11	NanoHeater	60	34.95	34.95	Skylar Morgan	2097	
12							

- Review your updated spreadsheet.

 This could help with identifying best and worst-selling products.

- Sort alphabetically by **Product Name**, by entering the following Gemini Prompt:

 Open to view the Sample prompt: ^

T Sort the data alphabetically by product name.

 Expand this hint for guidance on sorting using Gemini. ^

- Select any empty cell, and then open the Gemini sidebar.
- Enter T Sort the data alphabetically by product name., and then select **Enter**.

- Verify that your spreadsheet is sorted alphabetically by Product Name.

A2:F11		AirChiller Pro					
	A	B	C	D	E	F	G
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue	
2	AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9

12							

 Organizes products for easier scanning and lookup.

- Highlight Salespersons from the **West** Region, by entering the following Gemini Prompt:

Open to view the Sample prompt:

T Highlight all rows where Region is 'West'.

Expand this hint for guidance on sorting using Gemini.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Highlight all rows where Region is 'West', and then select **Enter**.
- Notice that even though Gemini cannot perform that action, it walks you step-by-step through the process.

Visually separates performance by region.

- Highlight **Products with Price > \$100**, by entering the following Gemini Prompt:

Open to view the Sample prompt:

T Highlight rows where Price per Unit is greater than 100.

Expand this hint for guidance on sorting using Gemini.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Highlight rows where Price per Unit is greater than 100., and then select **Enter**.

- Select **Apply**, and then review the conditional formatting.

	A	B	C	D	E	F	G

11	UltraFan	175	45	45	Avery Thompson	7875	
12							

Identifies premium/high-cost products.

- Add a rank column based on revenue by entering the following Gemini Prompt:

Open to view the Sample prompt:

T Add a new column that ranks products by Total Revenue, highest to lowest.

Expand this hint for guidance on sorting using Gemini.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Add a new column that ranks products by Total Revenue, highest to lowest., and then select **Enter**.

- Review Gemini's plan, and then in cell **G1**, enter **T** Revenue Rank.
- In cell **G2**, enter **T** =RANK(F2,\$F\$2:\$F\$11,0), and then in the *Suggested Autofill* dialog, select **OK**.

- Review your updated spreadsheet and added column.

	A	B	C	D	E	F	G	H
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue	Revenue Rank

12								

Helps quickly see which products are top earners.

- Filter for a single salesperson's data by entering the following Gemini Prompt:

Open to view the Sample prompt:

T Filter the sheet to show only sales by Morgan Lee.

Expand this hint for guidance on sorting using Gemini.

- Select any empty cell, and then open the Gemini sidebar.
- Enter **T** Filter the sheet to show only sales by Morgan Lee., and then select **Enter**.

- Review Gemini's plan, and then select **Apply**.

	A	B	C	D	E	F	G	H
1	Product Name	Units Sold	Price per Unit	Price per Unit	Salesperson	Total Revenue	Revenue Ratio	
6	PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998	2	
12								

Isolates one rep's performance for analysis.

- Remove the filter.

Exercise 5: Forecast Sales with Gemini

- Predict Q3 sales based on Q2 data by using the following prompt in Gemini:

Open to view the Sample prompt:

T Forecast Q3 sales based on this Q2 data and add values to column G.

Expand this hint for guidance on predicting sales data using Gemini.

- Select cell **H1**, enter **Q3 Forecast**, and select **Enter**.

	G	H	I
1	ue Rank	Q3 Forecast	
2			
3	4		
4	3		
5	1		
6	9		
7	2		
8	7		
9	10		
10	8		
11	6		
12	5		

- Open the Gemini sidebar, and then enter **Forecast Q3 sales based on this Q2 data and add values to column H.**

Forecast Q3 sales based on this Q2 data and add values to column G.

- Review Gemini's results, and then select **Insert**.

Product Name	Units Sold	Price per Unit
AirChiller Pro	110	89.99
EcoVacuum	160	99
GrillMaster 3000	130	150
NanoHeater	60	34.95
PowerDrill Pro	200	79.99
SmartBlender	90	49.99
SolarCharger	75	24.99
SoundBar X	80	69.99
UltraFan	50	19.99
WaterPurifier	120	39.99

- Select **Add to new sheet**

- Gemini may add a projected % increase or trend-based values.

Table1															
Product Name	#	Units Sold	Price per Unit	Price per Unit.1	Salesperson	Total Revenue	Revenue Rank	#	Q3 Forecast						
AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9	4	10888.79								
EcoVacuum	160	99	99	Taylor Brooks	15840	3	17424								
GrillMaster 3000	130	150	150	Cameron Rivera	19500	1	21450								
NanoHeater	60	34.95	34.95	Skylar Morgan	2097	9	2306.7								
PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998	2	17597.8								
SmartBlender	90	49.99	49.99	Chris Evans	4499.1	6	4949.01								
SolarCharger	75	24.99	24.99	Alex Chen	1874.25	10	2061.675								
SoundBar X	80	69.99	69.99	Emily White	5599.2	5	6159.12								
UltraFan	50	19.99	19.99	Jessica Lee	999.5	8	1099.45								
WaterPurifier	120	39.99	39.99	David Kim	4798.8	7	5278.68								

Column H is now filled with Gemini-generated forecasts.

- Predict how many units each product might sell in Q3, assuming moderate growth based on Q2 performance by using the following prompt in Gemini:

Open to view the Sample prompt:

T Forecast Q3 Units Sold for each product with a 10% increase over Q2, based on this Q2 data and add values to column H.

Expand this hint for guidance on predicting sales data using Gemini.

- On the **sheet2** spreadsheet, in the Gemini sidebar, enter **T** Forecast Q3 Units Sold for each product with a 10% increase over Q2, based on this Q2 data and add values to column H., and the select **Enter**.
- Gemini will calculate values like $=B2*1.10$ and autofill down.

Gemini

Analysis steps

The 'Q3 Units Sold Forecast' column has been updated with values based on a 10% increase over Q2 'Units Sold'.

Here's the updated data:

Insert Copy

Product Name	Units Sold	Price per Unit
AirChiller Pro	110	89.99
EcoVacuum	160	99.00
GrillMaster 3000	130	150.00
NanoHester	60	34.95
PowerDrill Pro	200	79.99
SmartToaster	70	39.95
SparkPlugX	85	24.50
ThunderWidget	120	19.99

- Review Gemini's results, select **Insert**, and then select **Insert tables only**.

ThunderWidget	120	19.99
TurboBlender	95	49.99
		45.00

Insert text only

Insert tables only

Insert all

Insert Copy

- Review your updated table.

The screenshot shows a Google Sheet titled 'Sales_data' with a table containing 12 rows of product sales data. The table has 10 columns: Product Name, Units Sold, Price per Unit, Price per Unit 1, Salesperson, Total Revenue, Revenue Rank, Q3 Forecast, and Q3 Units Sold Forecast. The data is as follows:

Product Name	Units Sold	Price per Unit	Price per Unit 1	Salesperson	Total Revenue	Revenue Rank	Q3 Forecast	Q3 Units Sold Forecast
AirChiller Pro	110	89.99	89.99	Jamie Taylor	9898.9	4	10888.8	121
EcoVacuum	160	99	99	Taylor Brooks	15840	3	17424	176
GrillMaster 3000	130	150	150	Cameron Rivera	19500	1	21450	143
NanoHeater	60	34.95	34.95	Skylar Morgan	2097	9	2306.7	66
PowerDrill Pro	200	79.99	79.99	Morgan Lee	15998	2	17597.8	220
SmartToaster	70	39.95	39.95	Peyton Reynolds	2796.5	7	4949.01	77
SparkPlugX	85	24.5	24.5	Casey Nguyen	2082.5	10	2061.68	93.5
ThunderWidget	120	19.99	19.99	Jordan Mitchell	2398.8	8	6159.12	132
TurboBlender	95	49.99	49.99	Devin Carter	4749.05	6	1099.45	104.5
UltraFan	175	45	45	Avery Thompson	7875	5	5278.68	192.5

Useful to model sales team goals or inventory needs.

- Select **Show suggestions**, and then review the additional options.

- Download the Sales_data.xlsx sheet to your Desktop.

Check your work

Summary

Congratulations, you have completed the **Use Gemini in Google Sheets for Data & Analytics** Lab.

You have accomplished the following:

- Added a Total Revenue Column.
- Created visual charts using Gemini.
- Asked Gemini questions in plain English about data.
- Formatted, sorted, and cleaned data.
- Forecasted future performance using Gemini.

Congratulations

ON COMPLETING THE

**Use Gemini in Google Sheets
for Data & Analytics lab**
